

Hello,

I am writing this as a passionate videographer with a focus on FPV drone technology. My name is Landon Lucero, and I am excited to offer my technical expertise to the world of production.

My experience with drones started from a young age, and I have since dedicated countless hours to becoming an expert in the field. I hold a Part 107 commercial drone operating certification through the FAA, and I have flown UASs recreationally for over five years and professionally over the past two through my own LLC, Eye Candy Aerials. I have shot footage for fashion boutiques, laser tag venues, live circus and musical performances, and many action sports, all while growing my portfolio and experimenting with new techniques and pushing the boundaries of what is possible with FPV.

In addition to my drone expertise, I hold a Bachelor of Innovation degree with a major in Visual and Performing Arts and a minor in Engineering Technologies. My degree is a testament to my passion for innovation and creativity. I am adaptable, quick to learn, and highly motivated to make the world a better place. I am confident that my skills and expertise will allow me to bring new and exciting perspectives to your productions.

I am seeking partnership opportunities with large-scale production companies to open up new avenues of creativity. I am confident that my unique set of skills and experience will make me a valuable asset to any production team. If you are interested in working with me, please do not hesitate to reach out. I am excited to hear about your upcoming projects and discuss how we can work together to create something truly spectacular.

Thank you for your time and consideration.

Best regards,

Landon Lucero

CEO at Eye Candy Aerials:

sUAS Consultant, Operator, Videographer

FREELANCE CONTRACTOR

I always take pride in the work I do. After studying for the past 4 years to become an innovator, I tend to walk the path not commonly taken. Separating myself from the crowd is definitely where I have learned to shine brightest. I have obtained lots of experience during my days in the BI program where I worked with real-world clients on various long-term projects. The charisma I have forged over recent years could easily be one of my greatest assets. I am incredibly open-minded about ideas I may have yet to consider. Simultaneously, I am proficient at pitching and communicating ideas which others have yet to give thought to. In large, I contribute to companies through the simple process of transforming my ideas into meaningful impact.

RELATED WORK EXPERIENCE:

Colorado Chameleon- Exotic Pet Specialist and Media/Website Manager

January 2020–June 2022

During my time building Colorado Chameleon's online following, I grew our presence on all social media platforms and reached over 5 million people. This project demonstrates my drive to create unique and impactful ventures. I accomplished this while wrapping up my degree, demonstrating my ability to manage multiple priorities and work efficiently under pressure.

Eye Candy Aerials- Drone Pilot in Command

Officially registered as an LLC on September 8th, 2021. This is my own personal free-lance, drone technology startup. Eye Candy Aerials specializes in high performance FPV and applications of next generation drone technology.
